

SENIOR CONSULTANT / ASSOCIATE - ENVIRONMENTAL NOISE

We are looking for a senior team member to join our environmental noise group, based in Melbourne.

If you would like to work in a creative environment, with excellent conditions and a highly competitive salary, then we would like to hear from you.

MARSHALL DAY ACOUSTICS

We are a leading acoustic consultancy and have been providing innovative acoustic designs for over 30 years, with major projects around the world. Marshall Day Acoustics (MDA) was formed in Auckland in 1981 by Christopher Day and Sir Harold Marshall. We now have over 85 acoustic engineers in thirteen offices covering Australia, New Zealand, China, Hong Kong, and France.

Our strength in acoustic design comes from the diversity of our team members, who come from engineering, architectural, musical and academic backgrounds. Our business strategy is based on delivering consultancy services to the highest standard. We therefore place the utmost value on our team, which has contributed greatly to our enviable level of staff retention.

Our environmental noise group is based in Melbourne, with supporting team members in our Adelaide, Perth and Sydney offices. The group comprises specialists in measurement, modelling and analysis of environmental noise, and provides services to projects ranging from local planning assessments to large scale infrastructure and environmental impact assessment. Important market sectors for the environmental group include general planning, road infrastructure, rail infrastructure, aviation and the wind industry. Overall, the environmental market is a priority growth area for MDA. The work of the environmental group is to facilitate this growth at a national level and, where opportunities emerge, at an international level.

THE OPPORTUNITY

We are seeking a highly experienced acoustic engineer to join the management personnel of our environmental noise group. In particular, the new team member will have experience at a senior level in the delivery and management of consultancy services to large scale environmental impact assessment and infrastructure projects. A combination of strong technical and professional skills will be necessary in this role.

Key duties of the role include:

- Engaging in the management of the environmental noise group at staff, project, financial, innovation and business development levels
- Leading a sector within the environmental noise division, ideally in the transportation sectors
- Conducting project work at consultancy and management levels across a range of projects delivered by the environmental group
- Broader management activities associated with the overall operations of MDA Australia

If you would like to be part of our team, please send your CV and covering letter to Sally Campbell at scampbell@marshallday.com. Applications requested by 25 November 2016.
